

General Minimum Requirements for Contactors

Lafayette Airport Commission

Lafayette Regional Airport

1. Storage

- a. **If greater than or equal to 1320 gallons of oils will be stored on the site then a SPCC Plan will be required.**
 - i. **The plan must be submitted to LAC before over 1320 gallons of oil can be stored on the site.**
 - ii. **Note that the 1320 gallon count does include any fuel trucks kept on the construction site**
- b. All oil storage containers greater than or equal to 55 gallons must have secondary containment. The minimum volume of secondary containment must be 110% of the storage containers volume.
- c. All containers must have a label, which clearly states the owner of the container and its content.
- d. All containers must remain tightly sealed unless in use.
- e. All waste materials should immediately be properly stored until they can be properly disposed.
- f. Items such as: storage containers, waste, Port-o-potties, etc. should not be placed on or in the vicinity of a storm drain, ditch or other water body.

2. Spills

- a. If a spill occurs at the site generally the following actions should be taken:
 - i. If at all possible, **stop the source of the spill immediately**. If conditions are **HAZARDOUS DO NOT APPROACH**.
 - ii. Take **immediate actions to keep the spill from reaching surface waters** (i.e. ditches, storm drains, etc.)
 - iii. Determine the source, type, and quantity of material spilled.
 - iv. **Immediately contact** the Airport Response and Fire Fighting Department (ARFFD) at **337-233-1652**.
 - v. **Immediately contact** Airport Security at **337-266-4461**.

3. Washing

- a. Washing or rinsing of equipment, vehicles, containers, etc. is not allowed on airport property.
- b. Washing out of concrete trucks should only be conducted in a designated proper concrete washout area.

4. Equipment

- a. Leaking equipment shall not be utilized on Airport Property.
- b. Equipment shall not be parked on or in the vicinity of a storm drain, ditch or other water body.

5. Borrow Pit Soil Requirements

- a. Each borrow pit utilized to bring soil onto the airport **should be sampled** for the following **before the pit material can be placed on airport property**:
 - i. RCRA Metals by Method 6020/7471A,
 - ii. Volatile Organic Compounds by method 8260B, and
 - iii. Semi-volatile Organic Compounds by method 8270C.

- b. The laboratory report summarizing the **sample results must be provided** to the **Lafayette Airport Commission's Environmental Department** for approval before the pit material can be placed on airport property.
- 6. Sediment Controls
 - a. No solid materials (i.e. construction materials, soil, etc.) shall be discharged
 - b. Minimize offsite tracking of soil and dust
- 7. Site Stabilization
 - a. Existing vegetation at the site should be preserved to the greatest extent practical and all disturbed areas of the site must be stabilized
 - b. Stabilization measures shall be initiated as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased, but in no case more than 14 days after the construction activity in that portion of the site has temporarily or permanently ceased.
